

Versatile drum samples with a thump– the delaMartial Drums

Darmstadt, Germany, September 20, 2011 – *The German magazine delamar and the Berlin-based sidsonic Libraries proudly present a drum samples collection with fresh and unused electronic sounds for producers.*

The brand new sample pack "delaMartial Drums" is meant to be the perfect combination of analog charme and digital precision and is as of today available for immediate download exclusively on www.delamar.de/specials/delamartial-drums/. Musicians and producers can look forward to an exciting sample package that offers over 1,000 individual samples of electronic drums and percussion elements. All sample material is arranged into 15 drum kits that are mapped for the most popular sampler-software giving users the best compatibility with their DAW.

The sample pack delaMartial Drums is created from a close collaboration of the Berlin instruments and sample libraries manufacturer sidsonic and the musician's magazine delamar. The aim was to give musicians and producers a professional sounding hodgepodge of sounds - fresh and unspoiled - by the hand. Every single sound was triggered on legendary sound generators (including a Vermona DRM1 MK3, the MFB or the Electron Machinedrum SPS-1 MK2) and then passed through analog filters of various modular systems, which give the samples their analog warmth. The result was finally transferred with high quality converters into the digital domain, and then refined further with software tools in high-quality. All samples are available to the user in WAV format and for the most popular Sampler own mappings were created (Kontakt, Reason, EXS24, Structure).

Nanno Lenz, managing director at sidsonic Libraries: "We are especially proud of the versatile applications of the delaMartial Drums. From electronic dance music to hip-hop - these drum samples can be used out-of-the-box, or shaped to match your own ideas of sound design ". Carlos San Segundo, managing editor at delamar, added: "We are very comfortable presenting a first-class and inspiring sample pack that remains affordable for young producers."

The sample library delaMartial Drums is available for 39.95 Euro (about US\$55) as instant download. As an introductory offer, all buyers get three bonus drum kits. The introductory offer is valid until 27/09/2011.

About delamar:

delamar is a german magazine dedicated to music production and home recording. Since 2006 musicians, DJs and producers obtain news, tutorials, reviews and other music-related stuff on a daily basis.

delamar is at www.delamar.de
